

RINGCENTRAL

Bring calls, messages, and meetings into a single, global cloud platform

RINGCENTRAL PHONE

AI-First Business Cloud Communications

Momentum delivers RingCentral as a complete, enterprise-grade cloud communications solution for organisations across EMEA. Combining AI-powered innovation with global reliability, RingCentral enables secure, flexible communication for today's hybrid and international work environments.

What is RingCentral Phone?

RingCentral Phone is an AI-enabled business cloud phone system that unifies enterprise calling, SMS, fax, and voicemail into a single, intuitive application. Delivered by Momentum across EMEA, RingCentral Phone is designed to replace traditional telephony with a flexible, software-based solution that works seamlessly across desktop, mobile, and desk phones.

It provides organisations with a modern, reliable phone system that supports hybrid working, multi-location environments, and international operations—without the complexity of legacy infrastructure.

KEY BENEFITS

Run all business calling, SMS, fax, and voicemail on one cloud phone system.

Deploy and manage your phone system centrally and scale with ease.

Support flexible working with calls and messages synced across all devices.

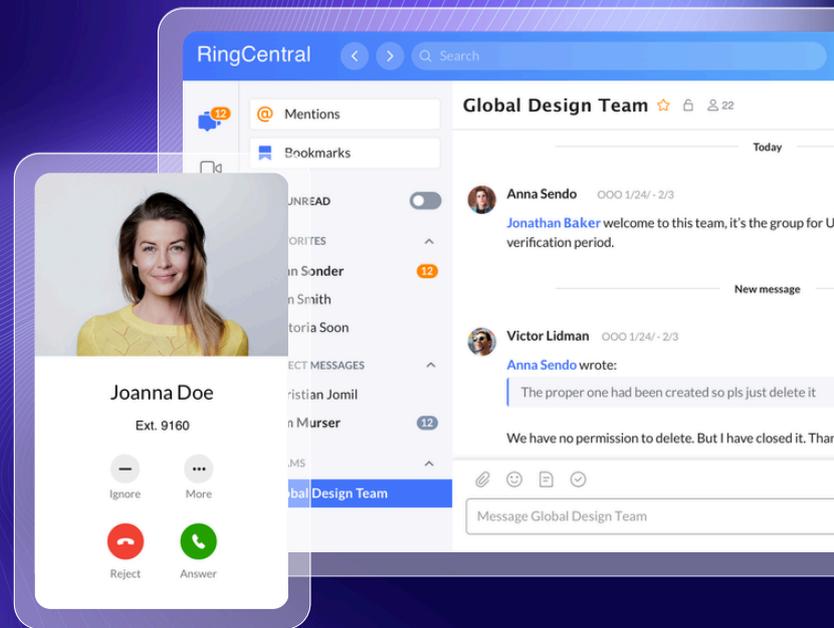

Rely on carrier-grade availability and security with a 99.999% uptime SLA across EMEA.

Embed enterprise telephony into daily workflows with native Microsoft Teams calling and app integrations.

Built for flexible, global work

Support hybrid and international teams with a cloud phone system that works across mobile, desktop, and desk phones, offers virtual numbers in more than 110 countries, and allows central management of users and locations without the complexity of traditional telephony.

FEATURES

Powerful calling and collaboration features

RingCentral Phone delivers a full enterprise calling experience designed to keep teams connected, responsive, and professional. Core calling, voicemail, messaging, and collaboration features are built into one cloud phone system, ensuring consistent communication across users, devices, and locations.

Advanced call handling

Route calls professionally and efficiently using features such as auto-attendant, call queues, call transfer, call park, and shared lines. These capabilities ensure calls reach the right people quickly and are handled consistently across teams.

Unified calling experience across devices

Make and receive calls on mobile, desktop, or desk phones with a fully synchronised experience. Calls, voicemails, and call history stay aligned across devices, allowing users to switch seamlessly without interrupting conversations.

Business messaging and voicemail

Communicate beyond voice with built-in business SMS and MMS, internet fax, and voicemail transcription. Messages and voicemails remain accessible in one place, improving responsiveness and reducing missed communications.

AI-powered capabilities for smarter calling

Intelligent, simple, and secure cloud telephony

RingCentral Phone combines AI-driven insights with simple deployment and management to help teams work more productively from day one. With deep integrations, native Microsoft Teams calling, open APIs, and enterprise-grade security, it delivers a modern and reliable cloud phone system for organisations across EMEA.

WHY MOMENTUM?

As a trusted RingCentral partner, Momentum helps organizations move beyond deployment to fully realize the power of AI-driven communications. We ensure RingCentral is not just implemented, but embedded into daily workflows in a way that accelerates adoption, improves performance, and delivers long-term value.

End-to-end delivery and expertise

Momentum supports organisations throughout the entire lifecycle of their RingCentral Phone solution. From design and migration to deployment and optimisation, we ensure a smooth transition from legacy telephony and a solution that aligns with technical, operational, and business requirements across EMEA. Beyond go-live, Momentum remains a single, accountable partner for support, optimisation, and continuous improvement with local presence and deep communications expertise.

Embedding AI where it delivers value

Momentum helps organisations adopt AI capabilities such as RingSense AI in a practical and purposeful way. By embedding AI-driven insights into everyday calling workflows, we enable teams to work more efficiently, improve communication quality, and turn conversations into measurable business outcomes.

Local Expertise, Global Platform

With Momentum, customers benefit from local expertise backed by a globally trusted RingCentral platform. We provide responsive support, regional understanding, and hands-on guidance while leveraging RingCentral's secure, scalable, and reliable communications infrastructure.

Modernise your business communications
